**Volume One (V1)**

**Scamhunters Bansenshukai**

**White Paper**

**SCAMHUNTERS**

## Introduction

It is only on the foundational basis of community that individual cryptocurrencies do not merely survive, but thrive and flourish. The guarantee of asset safety to each potential investor is always the crucial deciding factor for whether to take the leap or not. This ever-present issue of uncertainty is of the utmost importance, especially as the matter of airtight security becomes more complex and multifaceted.

For every starting venture, it is essential to construct a **detailed** and **precise roadmap** beforehand; in which all known factors and potential outliers are also considered as possibilities. In order to accomplish just that, a **strategem** fusing the necessary mindset of anticipating such factors and the symbolic ideology of Ninjas is molded.

Akin to sacred texts, ancient Ninjutsu was conducted according to ancient tomes known as "**The Bansenshukai**". We created this project with the intention to merge and evolve around the community on the basis of the five core characteristics of the ancient Ninjutsu manual, **wisdom, benevolence, trust, courage, and strictness**. According to The **Basenshukai**, once these foundations have been set and the favor of **Heaven, Earth, and Man** are aligned, even a force of only one **thousand soldiers** would be able to prevail over **multitudes of enemies**. **Victory** is the indisputable outcome, with the ability to emerge from one hundred battles unscathed one hundred times.

In conjunction with this, if the commander at the head treasures the counsel of his generals at his side, administers to the community, and maintains discipline within his army, there is no force to be feared, even when the numbers of the community are innumerably vast. This assurance stems from the preparation that a wise leader takes for the whole community, which in turn, also sharpens the prowess of his generals.

As a concluding thesis, there are countless people who have been standing on the side of righteousness, who are willing to fight for loyalty and with resourcefulness! If the leader excels in strategic planning, but none of his accompanying generals can act according to the circumstances, the leader's planning is all for naught. In the pursuit of fraudsters, victory in this perpetual battle is reliant on the ability to strike the enemy in a state of unpreparedness. As is the ninja way, we will descend upon them quickly from the shadows, having grasped their unlawful intentions. As a reflection of the art of **Ninjutsu**, the **Ninja** shall be our symbol.

With the foundational pillars of an effective and transparent Project Management Team, a resilient community, stellar leadership, and the ninja way including the five characteristics of the "Bansenshukai", it is with confidence that we can declare our intent to decrypt our enemy's plans and to foil their aspirations. In doing so, we will educate the general population and expose scammers and fraudsters, not only in the crypto space, but also in the world as a single entity.

## The Project

Our project fills a necessary niche within the current market as the exponential growth of cryptocurrency also entails the correlational rise of fraud and security concerns. The majority of the uncertainty that surrounds cryptocurrency has direct ties to the abyssal gap in the security sector in which we intend to fill.

The main vision is to firstly create a project that will survive and prosper in the proliferation of shitcoins that cryptocurrency is currently swamped in.

### Fact Check

- 9 out of 10 new token creations are scams, basic “honeypots”, or just poorly planned projects that wilt away under the leadership of amateurs.
- The general person that represents the norm of society is technically uneducated in matters of cryptocurrency.
- The authorities including governments, and people within the crypto community are currently unable or don’t intend to confront the rampant spread of fraudsters, both those in the real world and the online world.
- Scammers are uninhibited in Decentralized Exchanges and possess all the tools to steal potential investments from other legitimate crypto projects.

We aim to set a winning record of fixing these flaws within our maximum potential.

Through the tokenomic ecosystem based on the Binance Smart Chain, our main landmarks are to build a functional website, a mobile application, a Youtube TV, and a Scamhunters Magazine platform to educate and simplify basic security measurements. Holders of Scamhunters token will be able to earn more tokens and help limit scam activity simultaneously. We also have plans to research biometric safety and develop/research security-inspired technical inventions for the added safety of users. As is explicitly suggested by the name of our token, we aim to collect evidence of frauds and scams to expose them, both in a tangible sense and in the online community. Through our Scamhunters platforms, users will be able to search for blacklisted wallets that are associated with scams, educate themselves on protection against fraud, and also easily find transparent information on all new token launches in the Binance Smart Chain and Ethereum Network to begin with. Cooperation and partnership with relevant companies, lawyers, agencies, and Centralized Exchanges is paramount to efficiently report fraudsters, stop them, and potentially recover lost funds, and to also develop economic relationships within the security sector.

**The ultimate goal is to get listed on Centralized Exchanges as collateral pair for other FIAT and Cryptoassets.**

# Tokenomics

<b>Tokenomics (\$SHU</b>	*Locked supply(Out of Circulation) until 2025-01-01
<b>Total Supply(100%)</b>	1 337 000 000 000
<b>Circulating Supply(60%)</b>	802 200 000 000
<b>Locked Supply*(40%)</b> Until 2025-01-01 for future Liquidity pairs and Exchange listings	534 800 000 000
<b>Pre-Launch Raised ICO</b>	27 BNB approx 9000\$
<b>Pre-Launch ICO Price</b>	1 BNB = 7 000 000 000 \$SHU tokens Approx price at 0.0000000428\$ per \$SHU
<b>(18.86%) Initial Project wallet Distribution +  (14.636%)ICO Sold(<a href="#">Link to transaction</a>)</b>	(18.86%) or 250 000 000 000 to Project Development  (14.636%) 195 691 925 889 sold Pre-launch on Initial Dex Offering from 2021-07-24 until 2021-07- 31
<b>Initial Locked Liquidity Pool(26.665..%)</b>	356 508 074 111
	<b>Percentages are an approximate, there might be a small error of margin of less than 0.5%</b>

## Transaction Tax

<b>Transaction Tax(3%)</b>	<b>2% Static reflection to Holder</b> <i>(Auto added to your wallet balance)</i>
We use a low tax, because we intend to be used for utility, collateral and future exchange listings.	<b>1% Auto-add to Liquidity Pool</b>
<b>As we aim for long-term sustainability and a healthy liquidity pool, we will not impose any strange rules or restrictions to trading, other than above stated tokenomics.</b>	<b>0% to Project/Dev</b> <i>(We decided to reward and give a incentive to holders, by giving 2% to all holders instead)</i>

# Scamhunters Team

## PROJECT MANAGEMENT GROUP

**Powerful ninjas carry important expertise**

Communities are the main building blocks of successful companies and organizations.

Scamhunters current Project Management team combined experience and organization structure.

- IT/Computers - 100+ years combined
- Computer games - 100+ years combined
- Economy education & experience - 50+ years combined
- Cryptologi - 20+ years combined
- Marketing - 50+ years combined
- On top of that we got other not mentioned skill assets - That will be used for our community and against fraudsters.

Organization will consist of five teams, consisting of five entities within each category, the categories are strategic team, developing team, marketing team, designing team, and a human resources/public relations/moderating team.

The holy trinity of information between the community, the developers, marketers and investors will be of crucial essence to the success of any organization or project. We understand this, therefore we developed several management and community engagement platforms, pre-launch.

**We will not publicly reveal our identities. However, within our core management team, when handling business enquiries, newspapers, exchanges, and other projects, we will work closely and transparently with well-intentioned people and companies.**

## Frequently Asked Questions

### **Will you renounce ownership?**

*Not initially, since this is intended to be a long-term project. Until we grow a substantial amount of community members and holders, we will not renounce ownership.*

**In the future, it's up to the community to decide.**

### **Why don't you, the creator, go public with your identity?**

*As we will work in the security industry, anonymity is required to work at our full potential.*

*Internally speaking, we are just a bunch of normal people from all around the world, Canada, United States, Africa, Europe, Asia, and Scandinavia, among other countries.*

*According to the art of ninjutsu (specifically pertaining to the secrecy within), we do not need to show our faces to be work effectively. We do like to voice chat occasionally, and some of our core members of management are already acquainted with each other, having been united in purpose against scammers. As the cryptocurrency will only continue to expand and the need for solidarity will increase as well, we have the intention to meet in person.*

### **Will you burn any tokens?**

*Bad tokens tend to use "soft burns" of tokens that are sent to a "dead" address to incentivize investors to take advantage of this perceived benefit. However, there is no actual burning happening; the tokens just stay in a wallet, that is susceptible to hacker attacks, etc. The value of tokens also continues to be reflected in the total supply.*

*As educated economists, we don't believe in burning assets. Rather than discarding them out of circulation, or using them as leverage in the future (like a stock company does), we intend to utilize our tokens to the fullest extent. As a general tidbit of knowledge, the concept of a burn is illogical, as the value of your tokens is already increasing through the 1% static reflection. That means that for every transaction, the holders receive 1% and if you choose to "hold" this 1%, it works as a burn, but the Token asset gets sent to the holder instead of a dead address. From any perspective, it's clear that this is a better alternative to foster sustainable tokenomics, is it not?*

### **Wen lambo?**

*For us in the project management team, our focus is not on the short-term chart movements. Rather, our eyes are turned towards the attainable horizon of long-term healthy sustainability and a healthy liquidity pool.*

*We want to get listed on Exchanges as a serious collateral trading alternative. And to be righteous to our holders, we need to have long-term stability in mind. With a healthy project wallet, and assets stored for future Liquidity pairs and exchange listings, we can ensure that this continues to hold true.*

*So lambo when? Well 2024... maybe?*

*The cryptocurrency industry is on a trend of parabolic rise, and we will be there to monitor the growing space, all while rewarding investors for their support in our cause.*

# Disclaimer

- The sole purpose (the "Purpose") of this White Paper(the "White Paper") is to provide information on the initial dex offering of tokens("Tokens") in relation to bring clarity to the Scamhunters (\$SHU) project (as described herein)(the "Scamhunters").
- The draft white paper contents are not intended to constitute an offer for sale, prospectus or invitation to subscribe for or purchase Tokens.
- The White Paper is not a recommendation to purchase Tokens, and its contents do not constitute as "investment advice" for any purpose.
- Before purchasing Tokens, potential purchasers are strongly advised to take professional advice. No representation or warranty is given as to the information contained in the Draft White Paper which has been verified by the Project Management Team.
- Token sales are typically a highly speculative form of investment. Current and future investors should be prepared for the possibility of quick financial gain, or the loss of their investments completely. Investments in tokens is not subject to existing capital market regulations and protections(unfortunately – We aim to change this).
- Some statements in this whitepaper may contain modal verbs (words that anticipate the possibility of) such as but not limited to "may", "will", "should" ,"plan", "expect", "anticipate", "estimate", "project",etc. These statements are based on our current expectations and involve a number of known and unknown uncertainties and other factors that could impact the Token's actual performance.
- The users of the Token are solely responsible to determine what, if any, taxes apply to their Scamhunters token transactions. The owners of, or contributors to, the project management team are NOT responsible for determining the taxes that apply to your Token transactions and profits.
- Unless otherwise required by law, in no event shall the owners of, or contributors to, the Token be liable for any damages of any kind, including, but not limited to, loss of use, loss of profits, or loss of data arising out of or in any way connected to the use of the Token.

This disclaimer was amended for the last time on July 31st, 2021
